Mass Air Flow Sensors & Electronic Throttle Bodies ^{at} **A&Jay** **August 2017**

Every Standard® and Intermotor® Mass Air Flow Sensor is 100% NEW, not remanufactured. All SMP-manufactured MAF Sensors are engineered and built in our vertically integrated TS16949-certified facility in Orlando, FL. SMP-manufactured sensors are designed with improvements such as thicker walls, upgraded components, and a custom-designed platinum RTD sensor. The result is a line of 100% NEW MAF Sensors that provide highly accurate readings and precise airflow output under all operating conditions.

Electronic Throttle Bodies

The Problem: Electronic throttle bodies have high failure rates. When the original fails, it can affect a vehicle's power, fuel economy, and drivability.

Our Response: Meeting the demand for high-quality replacements, TechSmart's line of Electronic Throttle Bodies includes more than 150 direct-replacement units. To ensure quality and reliability, each unit is 100% new, never remanufactured. Plus, with our units, you won't encounter comebacks due to worn items in a partial rebuild.
