**The TPMS service solution that's ready right out of the box.**  
VDO REDI-Sensor is a TPMS service breakthrough based on the concept of having the sensor preprogrammed to work with multiple makes and models. VDO REDI-Sensor TPMS sensors come preprogrammed and are designed to follow OE vehicle relearn procedures.

**Works with all major TPMS scan tools**  
Because REDI-Sensor is designed to follow OE vehicle relearn procedures, no extra programming steps or investments in special tools and software are needed. If a shop has the TPMS scan tools and know-how to handle OE sensors, it's ready for REDI-Sensor!

**Eliminate delays and lost service**  
Having REDI-Sensor in the shop reduces your inventory needs and eliminates service delays. With just 4 REDI-Sensors on hand, you can service TPMS equipped vehicles without having to wait for parts delivery.

**Broad coverage and choice of stems**  
VDO REDI-Sensor TPMS sensors provide extensive domestic, Asian and European vehicle coverage from 2002 – 2016, including recently expanded coverage for GM truck "PWM." Now, for service techs looking for the option, we offer VDO REDI-Sensor with a choice of a familiar rubber snap-in valve stem or our original aluminum clamp-in stem.
